

Service Partner Principles - Review Draft

Important status

This is not the final subcontract. Israeli counsel, accountant and insurance adviser must approve classification, licensing, tax, insurance, payment and non-solicitation terms before assignment.

Role

The partner accepts a specific CleanFixHarish assignment for a written payout. CleanFixHarish remains the customer-facing contractor and owns scope, quote, communication, quality close and remediation.

Eligibility

Identity, business and invoice capability, service boundaries, references, applicable licences, insurance, availability and payout floor must be current. Expired or missing evidence pauses eligibility.

Customer relationship

No personal business card, private quote, direct payment or invitation to bypass CleanFixHarish is permitted on an assignment. Future requests from a customer introduced by CleanFixHarish are redirected to CleanFixHarish. Any final restriction must be narrow, time-limited, exclude provable pre-existing relationships and use proportionate remedies.

Confidentiality and privacy

Customer identity, address, photos, access details, prices, job packets and communications are confidential and used only for the assignment. No independent marketing, copying or unnecessary retention.

Execution

The partner follows the immutable scope, safety requirements and evidence checklist, identifies through the approved arrival process and may not substitute another person without CleanFixHarish approval and customer notice.

Change orders

Unexpected work is documented and the affected task pauses. Only a CleanFixHarish written change order approved by the required parties can change scope, customer price, schedule or payout.

Quality and incidents

Completion evidence is submitted for review. Safety, injury, damage, harassment, fraud or privacy incidents are reported immediately and preserved. Rework and deductions require evidence, notice and review.

Payout

The assignment displays the agreed payout, material responsibility and conditions. Planning target: eligible undisputed payout within two business days after quality close and cleared payment. Final tax, invoice, withholding, dispute and bank-verification rules require professional approval.

Independence and classification

The operational reality, not the contract title, determines employment classification. The final model must preserve genuine independence or use compliant employment/service-company arrangements where control or dependency becomes employee-like.
